

**Finally! A Safety Signal controlled by any Bluetooth enabled smart phone or tablet.**

This Low energy LED Traffic Light is controlled by any smart phone or tablet through a simple user interface available as a free downloadable app.

The safety signal is suitable for a wide variety of critical applications including: Safety status indication, Operational status and production line warning signals, severe weather notification & more!

The control range is dependent on your Bluetooth signal strength but is most effective between 100 and 300 ft. Unlike other remote control solutions full signal change feedback is included in the standard app so view of the signal is not required for reliable operation.

This SmartLink Safety Signal can be used for indoor or outdoor applications and is visible over 1200 feet away!

To learn more about the SmartLink Safety Signal call us at 316-409-4911 or check us out online at [Trafficlights.com](http://Trafficlights.com) for more safety and traffic signal products. We are the global leader in remote controlled Safety Lights since 2004. 3 year manufacturer's warranty.
